STAFF OPERATIONAL TRAINING MANUAL

Standard Operating Procedures (SOP) & Comprehensive System Handbook

VERSION 1.0 (OFFICIAL)

ORGANIZATION

Raudah Travels & Tours Limited

DOCUMENT REF

RTT-SOP-2026-V1.0

HEAD OFFICE

City Scape/Shariff Plaza, Wuse 2, Abuja

DATE OF ISSUE

October 2026

Operational Department Modules Covered in this Edition:

● Registration & Front-Desk

5-Step wizard, AI OCR scan, Mahram matching, bulk upload

● Passport & Document Vetting

Saudi 6-month validity rule, quality check, batch export

● Visa Operations Desk

5-Stage pipeline, provider dispatch, e-Visa PDF upload

● Accounting & Finance

Bank transfer verification, Paystack reconciliation, thermal receipts

● Flight Logistics & Operations

Package dates, Hijri schedule, color ID badges with QR

● Executive Administration

Staff permissions, AI Business Assistant, security audit trail

TABLE OF CONTENTS

Master reference guide to system functions, departmental responsibilities, and operational workflows.

Mod	Operational Module Title	Summary Scope & Workflows	Page
01	System Architecture & Login	Portals overview, Clerk auth, roles, and console layout	03
02	Registration & Front-Desk Department	Walk-in wizard, AI Passport OCR, batch upload, master list	04
03	Passport & Document Verification	Saudi 6-month rule, expiry warning flags, photo cropping	06
04	Visa Operations Department	Status pipeline, external providers, bulk approvals, e-Visa upload	07
05	Accounting & Finance Department	Bank transfer verification, Paystack, balances, receipts	09
06	Operations, Flights & Logistics	Package setup, departure dates, printable ID badges with QR	11
07	Customer Support & Team Communication	Ticket assignment, priority queues, internal team chat	13
08	Super Admin & Executive Tools	Staff roles & granular permissions, AI Assistant, audit logs	14
09	Troubleshooting Guide & Escalations	Common error resolution, emergency procedures, contacts	15

[STAFF BEST PRACTICE] Staff Operational Standard: Zero Manual WhatsApp Operations

All pilgrim records, passport photos, payment receipts, and e-visa documents must be uploaded and processed exclusively through the Raudah Web Application. Never store pilgrim passports or banking receipts on personal phones or personal spreadsheets. The application creates immutable audit trails for every transaction.

MODULE 01

System Architecture & Navigation

Overview of the four synchronized system portals, Clerk authentication, user roles, and Admin Console interface.

1.1 The Four Unified System Portals

The Raudah digital platform connects four synchronized portals sharing a central PostgreSQL database and Express API server:

- **1. Public Portal (/):** The public website for marketing, package discovery, company profile, and agent partnership applications.
- **2. Pilgrim Self-Service Portal (/dashboard):** Where pilgrims monitor booking progress, pay online via Paystack, download e-visas and flight tickets, and open support tickets.
- **3. Agent B2B Portal (/agent):** Where accredited travel agencies register pilgrim clients with AI Passport OCR, manage commissions, and pay via prepaid wallet.
- **4. Admin Operations Console (/admin):** The operational engine used by Raudah staff across Front-Desk, Visa, Accounting, Logistics, and Management.

1.2 Staff Role Hierarchy & Access Matrix

Every staff account is created by Super Admin and assigned strict page-level permissions to safeguard financial and pilgrim data:

Staff Role	Access Level	Key Operational Permissions	Safeguard Rules
Super Admin	Total System Access	Configures site settings, manages bank accounts, creates staff, views all financials	Full audit logging; irreversible actions protected
Admin	Managerial Control	Approves visas, overrides package pricing, authorizes agent top-ups	Cannot delete staff accounts or edit API keys
Staff	Role-Restricted	Registration, passport review, payment verification, ticketing, support	Access strictly limited to assigned module permissions
Agent	Agent Portal Only	Registers pilgrim clients, pays via agent wallet, tracks client visa status	Isolated strictly to their own registered clients

1.3 Navigating the Admin Console

Upon signing in at /sign-in with your assigned work email, the Admin Console features an intelligent sidebar organized into five functional groups:

- **Main Group:** Platform Overview stats, Business Analytics, and the Gemini AI Business Assistant.
- **Operations Group:** Packages catalog, Bookings management, Payments & accounting, Pilgrims master list, and Register wizard.
- **Pilgrims & Travel Group:** Printable ID Tags, Passports verification queue, Visa Management console, Amendments review, and AI WhatsApp registrations.
- **Agents & Finance Group:** Agent accounts, commission rates, wallet top-ups, and Company Bank Accounts.
- **System Group:** User accounts, Customer support tickets, Contact enquiries, Internal Team Chat, Staff management, Audit activity log, and Backup.

[OPERATIONAL NOTE] Screen Space Tip: Sidebar Collapse Mode

Staff working on laptops can collapse the sidebar using the toggle at the bottom-left to maximize screen width when inspecting wide pilgrim manifests. On mobile devices, tap the top menu icon to open the full navigation drawer.

MODULE 02

Registration & Front-Desk Department

Step-by-step walk-in booking wizard, AI Passport OCR, Mahram compliance, batch group upload, and Master Directory management.

2.1 The 5-Step Pilgrim Registration Wizard (/admin/book-pilgrim)

When a walk-in or telephone pilgrim registers, follow this exact 5-step wizard to ensure complete compliance:

1

Package Selection & Departure Route

Select the active Hajj or Umrah package. Choose the departure flight date, departure city (e.g. Kano, Abuja, Lagos), and room occupancy preference (Single, Double, Triple, Quad). If booking through an agent, select the agent name.

2

Passport OCR Scan & Automatic Face Crop

Click 'Upload Passport Image' or use the front-desk webcam. Google Gemini AI scans the biodata page and auto-populates passport number, full name, date of birth, expiry date, gender, and nationality in <3 seconds, while cropping a 400x400 portrait photo.

3

Personal & Mahram Compliance Details

Verify extracted fields. Enter Title (Alhaji, Hajiya, etc.), Arabic Name (optional), NIN, occupation, and marital status. MANDATORY: For female pilgrims under 45 traveling under standard rules, assign a registered male relative (Mahram) from the dropdown.

4

Contact & Next of Kin Information

Enter primary phone number (include +234 country code) and email. Input residential address, State of origin, and LGA. Record Next of Kin's full name, relationship, and reachable emergency phone number.

5

Payment Mode & Instant Confirmation

Choose payment method: Cash, Bank Transfer (with receipt upload), or Paystack online. Enter initial deposit amount. Click 'Confirm Booking' to generate the official reference (e.g. RD-2026-UMR-0042) and print registration confirmation vouchers.

[MANDATORY COMPLIANCE] Saudi Mahram Regulations for Female Pilgrims

Saudi consular policy requires that female pilgrims below age 45 traveling without special ministerial group waivers must be linked to a recognized Mahram traveling on the same package. The system alerts staff if this field is missing.

2.2 Batch Passport Registration for Groups & Families

For tour groups, corporate delegations, or families, do not register pilgrims one by one. In /admin/book-pilgrim, click 'Batch Passport Upload':

- **Step 1:** Select multiple passport images from your computer (up to 20 files at once).
- **Step 2:** The AI parses all passports concurrently and displays an editable summary table.
- **Step 3:** Review all pilgrims in the grid, make any quick corrections, and select a shared package & departure date.
- **Step 4:** Click 'Register All Pilgrims' to create linked booking records with individual reference numbers.

2.3 Reviewing AI WhatsApp / Telegram Submissions (/admin/ai-registrations)

Pilgrims and agents can initiate registrations via Raudah's AI Chatbot on WhatsApp or Telegram. These arrive in the AI Registrations queue:

- **1. Duplicate Alert:** The system flags duplicate passport numbers or names before approval (possible_duplicate / duplicate_confirmed).

- **2. Document Inspection:** Inspect the raw passport photo sent by the user alongside the extracted fields.
- **3. Approval:** Click 'Approve' to promote the submission into an active booking. The pilgrim receives an automatic WhatsApp confirmation.

MODULE 03

Passport & Document Verification

Quality standards, the Saudi 6-month validity rule, expiry warning flags, and batch document export.

3.1 The Passports Review Queue (/admin/passports)

Every uploaded passport must be vetted before the pilgrim is submitted for visa processing. The Passports queue displays real-time statistics:

Status Flag	Visual Badge	Meaning & Criteria	Mandatory Staff Action
Valid	Green (Shield)	Passport valid for more than 6 months from travel date	Cleared for visa submission queue
Expiring Soon	Orange (Clock)	Passport expires within 3 to 6 months	URGENT: Request immediate passport renewal from pilgrim
Expired	Red (Alert)	Passport has already passed its expiry date	STOP: Reject for visa. Pilgrim cannot travel on this document
Missing Doc	Grey (File)	Pilgrim booked but passport image not yet uploaded	Follow up with pilgrim or agent via phone/WhatsApp

3.2 Consular Image Quality Standards

Inspect every uploaded passport against these five mandatory consular standards:

- **MRZ Legibility:** All characters on the machine-readable zone (two bottom lines P<NGA...) must be sharp and unbroken.
- **No Flash Glare:** Ensure there is no bright white camera flash covering the name, passport number, or date of birth.
- **Four Corners Visible:** The entire page must be visible within the frame without cut-off borders.
- **Physical Document:** Must be a direct photo of the physical passport, not a screenshot of a photocopy.
- **Clear Portrait Crop:** The pilgrim's face crop must be clear, forward-facing, with no sunglasses or tinted lenses.

3.3 Batch Exporting Documents for Consular Submissions

When preparing group submissions for NAHCON or external visa partners: Filter by package -> Select all pilgrims -> Click 'Download Selected Passports' to download a clean ZIP archive of high-resolution passport scans organized by pilgrim name and reference.

MODULE 04

Visa Operations Department

Managing the end-to-end visa pipeline, external visa providers, bulk approvals, and e-Visa PDF synchronization.

4.1 The Five-Stage Visa Pipeline (/admin/visa-management)

The Visa Management console tracks every pilgrim from initial registration through final visa issuance:

Stage	Badge Color	Operational Meaning	Department Protocol
Awaiting Payment	Purple Badge	Booking created but required deposit or full fee not yet verified	DO NOT submit for visa. Accounting must verify funds first
Pending	Orange Badge	Payment verified; passport verified; waiting for provider assignment	Assign to registered Visa Provider agency
Submitted	Blue Badge	Passport submitted to Saudi Visa Portal or external service provider	Monitor application status daily for issuance
Approved	Green Badge	Visa successfully issued with valid visa number and expiry date	Upload issued e-Visa PDF and Flight Ticket PDF immediately
Rejected	Red Badge	Application rejected by consular portal (e.g. overstay, blacklisted, data mismatch)	Record detailed rejection reason and inform pilgrim/agent

4.2 Managing External Visa Providers

Raudah works with specialized visa processing partners. In the 'Visa Providers' tab, staff can register providers, contact persons, phone numbers, and specializations (e.g., Umrah B2B, Hajj Nuwabs, Tourist e-Visas). When assigning pilgrims, track which provider holds the physical passport.

4.3 Approving Visas & Uploading Travel Documents (Closing Workflow)

When issued e-visas and tickets are received from the consular portal:

- 1

Locate Pilgrim Record
Search by Passport Number, Booking Reference, or filter by Package.
- 2

Open Visa Editor
Click 'Update Visa' on the target row to open the details modal.
- 3

Enter Official Numbers
Input the official Visa Number and Visa Expiry Date issued by the Saudi portal.
- 4

Attach Official Files
Upload the Visa Document (PDF) and Flight Ticket (PDF). These are stored securely in cloud storage.
- 5

Set Approved & Save
Change status to 'Approved' and click 'Save'. The pilgrim's dashboard and agent portal immediately update with a green 'Visa Issued' badge and instant PDF download access!

MODULE 05

Accounting & Finance Department

Verifying bank transfers, Paystack audit, outstanding balance management, thermal receipts, and agent wallets.

5.1 Verifying Manual Bank Transfers (/admin/payments)

When a pilgrim or agent pays via direct bank transfer, the payment sits in 'Pending Verification' until verified by finance staff:

1

Inspect Payment Proof

Click the payment row to view the uploaded bank receipt, teller, or mobile app screenshot.

2

Bank Statement Reconciliation

Log in to Raudah's corporate bank portal (e.g., Jaiz Bank, Stanbic IBTC, Zenith) to confirm funds have cleared.

3

Approve or Reject

If cleared, click 'Verify Payment'. If fraudulent or incorrect amount, click 'Reject' with clear notes.

5.2 Outstanding Balances & Installment Management

Many pilgrims pay in installments. The 'Outstanding Balances' tab displays real-time debt tracking:

- **Balance Calculator:** Displays Total Package Price, Total Amount Paid to date, and Outstanding Balance in Nigerian Naira
- **Progress Bar:** Visual completion percentage (e.g. 25%, 50%, 100% Fully Paid).
- **Recording Installments:** Click 'Record Payment' on any pilgrim row. Enter amount paid, payment method (Cash, Bank POS), transaction reference, and optional notes.
- **Official Receipt Generation:** Click 'Print Receipt' to instantly generate a branded thermal receipt or full A4 payment voucher complete with booking reference, pilgrim name, amount paid, and remaining balance.

5.3 Managing Company Bank Accounts (/admin/bank-accounts)

Ensure bank details shown to pilgrims on invoices and the public portal remain up to date. Only Accounting and Super Admin staff have access to add, edit, or archive bank accounts (Account Name, Bank Name, Account Number, Currency).

5.4 Travel Agent Wallet Management & Commissions (/admin/agents)

Accredited agents maintain a prepaid wallet to pay for client bookings seamlessly:

- **Wallet Top-Ups:** When an agent transfers funds to Raudah's account for their wallet: go to /admin/agents -> Select Agent -> 'Top-Up Wallet' -> Enter amount and reference.
- **Double-Entry Audit Ledger:** Every debit and credit transaction is permanently recorded with timestamps and operator IDs.
- **Commission Payouts:** Track commissions earned per package and mark payouts when settled.

MODULE 06

Operations, Flights & Logistics

Package creation, flight dates with Hijri calendar, printable ID badges with QR codes, and booking amendments.

6.1 Package Creation & Date Scheduling (/admin/packages)

Operations staff configure Hajj and Umrah packages to meet seasonal market demand:

- **Package Types:** Hajj, Umrah, Visa Only, Ticket Only, Accommodation Only, or custom combined bundles.
- **Departure Dates & Flight Routes:** Set multi-date options with airline partner, outbound route (e.g. KAN -> JED), return route (MED -> KAN), and corresponding Islamic Hijri date.
- **Pricing Overrides:** Configure room occupancy surcharges (Single room +!800,000, Double room discounts).
- **Live Countdown Timer:** Enable countdown timers with automatic registration closure when capacity or deadline is reached.

6.2 Pilgrim ID Badge & Tag Generator (/admin/id-tags)

Before departure, every pilgrim must receive an official Raudah ID Tag for identification in Makkah, Madinah, Mina, and airports:

1

Select Target Package

Filter by Hajj or Umrah package and departure flight date.

2

Select Pilgrims

Select individual pilgrims or click 'Select All' for the flight manifest.

3

Automatic Color Coding

Badges are styled by tier: Gold gradient for Premium/VIP, Silver for Standard/Luxury, and Royal Indigo for Economy.

4

Embedded QR Code

Each badge features a dynamic QR code that when scanned by staff or Saudi authorities displays pilgrim emergency contacts, hotel details, and medical notes.

5

Print or Export to PDF

Click 'Print ID Tags' or 'Download PDF' for standard A6 laminator format.

6.3 Booking Amendments Review (/admin/amendments)

Pilgrims may request changes through their dashboard (room upgrades, phone number updates, date changes). Staff review the before/after comparison and approve or reject with explanatory notes.

MODULE 07

Customer Support & Team Communication

Specialty ticket routing, priority resolution, website inquiries, and internal staff team chat channels.

7.1 Support Ticket Management (/admin/support)

Support tickets opened by pilgrims or agents are automatically routed according to staff specialties:

Ticket Category	Assigned Department	Typical Pilgrim Issues	Target SLA
Payment Issues	Accounting & Finance	Transfer receipts, card charge queries, refund requests	Under 2 Hours
Visa Processing	Visa Operations Desk	Status inquiries, document resubmission, biometrics info	Under 4 Hours
Flights & Transport	Flight Logistics	Flight schedule updates, luggage allowance, seat preferences	Under 4 Hours
Booking Issues	Front-Desk / Registration	Name corrections, Mahram changes, room adjustments	Under 3 Hours
General Inquiry	Customer Care	Package inclusions, packing tips, vaccination rules	Under 6 Hours

7.2 Internal Team Chat (/admin/chat)

To eliminate chaotic WhatsApp groups, Raudah incorporates a secure, internal staff communication platform:

- **#flights-transport:** Flight manifests, delays, terminal arrangements, and bus transfers.
- **#visa-processing:** Consular quota updates, portal maintenance alerts, and rejected cases.
- **#finance-billing:** High-value transfer alerts, refund authorizations, and agent credit limits.
- **#accommodation:** Room assignments, hotel check-in lists in Makkah & Madinah.
- **#emergency:** Urgent on-ground issues in Saudi Arabia or pre-departure medical alerts.
- **Direct Messaging (DMs):** Private, encrypted 1-on-1 staff conversations.

MODULE 08

Super Admin, Security & Troubleshooting

Staff account provisioning, permissions matrix, AI Business Assistant, audit logs, and troubleshooting.

8.1 Creating Staff & Assigning Permissions (/admin/staff)

Super Admins create staff accounts and assign strict page-level permissions:

- 1

Click 'Invite Staff'
Enter full name, corporate email address, and initial temporary password.
- 2

Select Role
Choose 'Admin' or 'Staff'.
- 3

Assign Page Permissions
Check only the modules required for their daily duties (e.g. Visa staff receive: pilgrims, passports, visa_management).
- 4

Assign Support Specialties
Check support categories so pilgrim tickets route directly to them.

8.2 Security Audit Logs (/admin/activity)

Every key action (payment verified, visa status changed, booking modified, staff created) is logged with the operator's user ID, IP address, timestamp, and details for complete accountability.

8.3 Staff Troubleshooting & Quick FAQ

Symptom / Error	Root Cause	Immediate Solution
Passport OCR fails / timeout	Blurry image, heavy glare, or low light	Ask pilgrim for a flat, well-lit photo or enter details manually
Pilgrim cannot see issued visa	Visa marked approved but PDF not uploaded	Upload the e-Visa PDF in Visa Management -> click Save
Bank transfer not showing verified	Awaiting accounting reconciliation	Finance staff must confirm bank credit before verifying
Agent cannot book client	Insufficient prepaid wallet balance	Agent must transfer funds to Raudah bank and request top-up
Session expired error	Inactivity timeout on Clerk auth	Refresh browser and sign in again with work email

[MANDATORY COMPLIANCE] Emergency Operational Contacts & Escalations
For critical system issues, payment gateway discrepancies, or consular emergencies: Contact IT Systems Administration via #emergency chat or call 08036264607 / 08034803504.
