## Letter of Presentation

Dear Sir,

We are pleased to submit this proposal for the deployment of a Starlink broadband network and a robust Local Area Network (LAN) architecture at the Rimi Local Government Secretariat.

Effective administration in the modern era relies heavily on seamless digital communication. We have observed that the current lack of a reliable, high-speed network at the secretariat significantly stifles productivity, creates information silos, and slows down essential government operations.

By integrating Starlink's cutting-edge satellite internet with high-capacity indoor and outdoor access points, we will eliminate connectivity dead zones and equip your administrative departments with the infrastructure required for instant e-governance and efficient public service delivery.

We are confident that this technological upliftment will transform the secretariat's daily operations. We look forward to partnering with Rimi Local Government to bring this vision to life.

Sincerely,

**ALIYU WADA UMAR**

CEO, TRACEROOT TECHNOLOGY SOLUTIONS

## Executive Summary

### Modernizing Administrative Operations

The modern governance landscape requires robust, reliable, and high-speed communication infrastructure. Rimi Local Government Secretariat currently faces significant operational bottlenecks due to poor connectivity. We present a **comprehensive Starlink deployment plan** engineered to eliminate these dead zones, connect your administrative offices, and ensure seamless communication across all departments.

#### High-Speed Access

Empower staff with low-latency, high-speed Starlink broadband to handle data-heavy administrative tasks.

#### Maximum Coverage

Indoor and outdoor access points ensure complete connectivity throughout the secretariat premises.

#### Reliable & Resilient

Say goodbye to frequent downtimes. Starlink offers enterprise-grade uptime irrespective of local grid constraints.

## Current Connectivity Challenges

The absence of a reliable, high-speed network presents multiple operational challenges that stifle the productivity and responsive capabilities of the Secretariat.

### COMMUNICATION DELAYS

Difficulty in sending and receiving critical administrative files, leading to sluggish decision-making and delayed citizen services.

### INFORMATION SILOS

Without a unified network, departments struggle to share digital resources seamlessly, forcing reliance on manual and time-consuming processes.

### POOR EXTERNAL CONNECTIVITY

Inefficient interaction with state and federal agencies, hindering compliance reporting and access to modern e-governance platforms.

## Network Upliftment & Impact

### A DIGITALLY EMPOWERED SECRETARIAT

By deploying a state-of-the-art Starlink network alongside a strategically mapped Local Area Network (LAN) utilizing high-power access points, we will completely transform the Secretariat's operational capability.

#### INSTANT E-GOVERNANCE

Facilitate real-time access to state portals, email systems, and digital records.

#### UNIFIED DEPARTMENTS

Provide all major offices with robust Wi-Fi, breaking down operational silos.

#### COST & TIME EFFICIENCY

Reduce physical travel for document delivery; embrace virtual meetings and instant sharing.

#### FUTURE-PROOF BACKBONE

A gigabit LAN infrastructure ready to support future CCTV, VoIP, and smart office expansions.

## Financial Proposal & Equipment Breakdown

Below is the detailed cost analysis for the procurement, deployment, and configuration of the Starlink network and associated infrastructure.

| ITEM DESCRIPTION                                               | QTY | UNIT PRICE (₦) | TOTAL (₦)  |
|----------------------------------------------------------------|-----|----------------|------------|
| Starlink V4 Gen 3 Kit                                          | 1   | 580,000        | 580,000    |
| Indoor High-Power Access Points<br>For maximum office coverage | 4   | 150,000        | 600,000    |
| Outdoor Access Point                                           | 1   | 270,000        | 270,000    |
| 6-10 Port Ethernet Switch                                      | 1   | 80,000         | 80,000     |
| Outdoor Gigabit LAN Cable (Roll)                               | 1   | 130,000        | 130,000    |
| Installation Accessories<br>Pipes, connectors, brackets, clips | 1   | 50,000         | 50,000     |
| Deployment & Configuration Cost                                | -   | -              | 300,000    |
| GRAND TOTAL (SETUP & DEPLOYMENT)                               |     |                | ₦2,010,000 |

### RECURRENT SUBSCRIPTION

Please note that Starlink requires a monthly subscription fee of **N81,000** to maintain active internet service.

## Implementation Plan

1

SITE SURVEY & PLANNING

2

EQUIPMENT PROCUREMENT

3

PHYSICAL DEPLOYMENT

4

TESTING & HANDOVER

## Ready to connect the Secretariat?

This proposal provides the definitive solution for overcoming administrative connectivity challenges, guaranteeing unprecedented efficiency for Rimi Local Government.
