RAUDAH TRAVELS & TOURS

OTA platform modification

Flights, hotels and packages on one booking platform: technical underlayer and page outcomes

October 2026

PLATFORM SCOPE

Three services, built to international OTA standard

Flight booking

Live booking engine with API integration

- Search, book and ticket in real time
- Aggregator API (GDS, NDC)
- Changes, cancellations and refunds

Hotel booking

Global content plus direct Saudi rates

- Live rates from bedbanks
- Direct Makkah and Madinah contracts
- Instant vouchers and clear cancellation terms

Package booking

Umrah, Hajj and tourism packages

- Fixed group departures for Hajj and Umrah
- Dynamic packages from live flights and hotels
- Installment payment plans

WHERE WE ARE GOING

From an Umrah package site to a live booking platform

Today

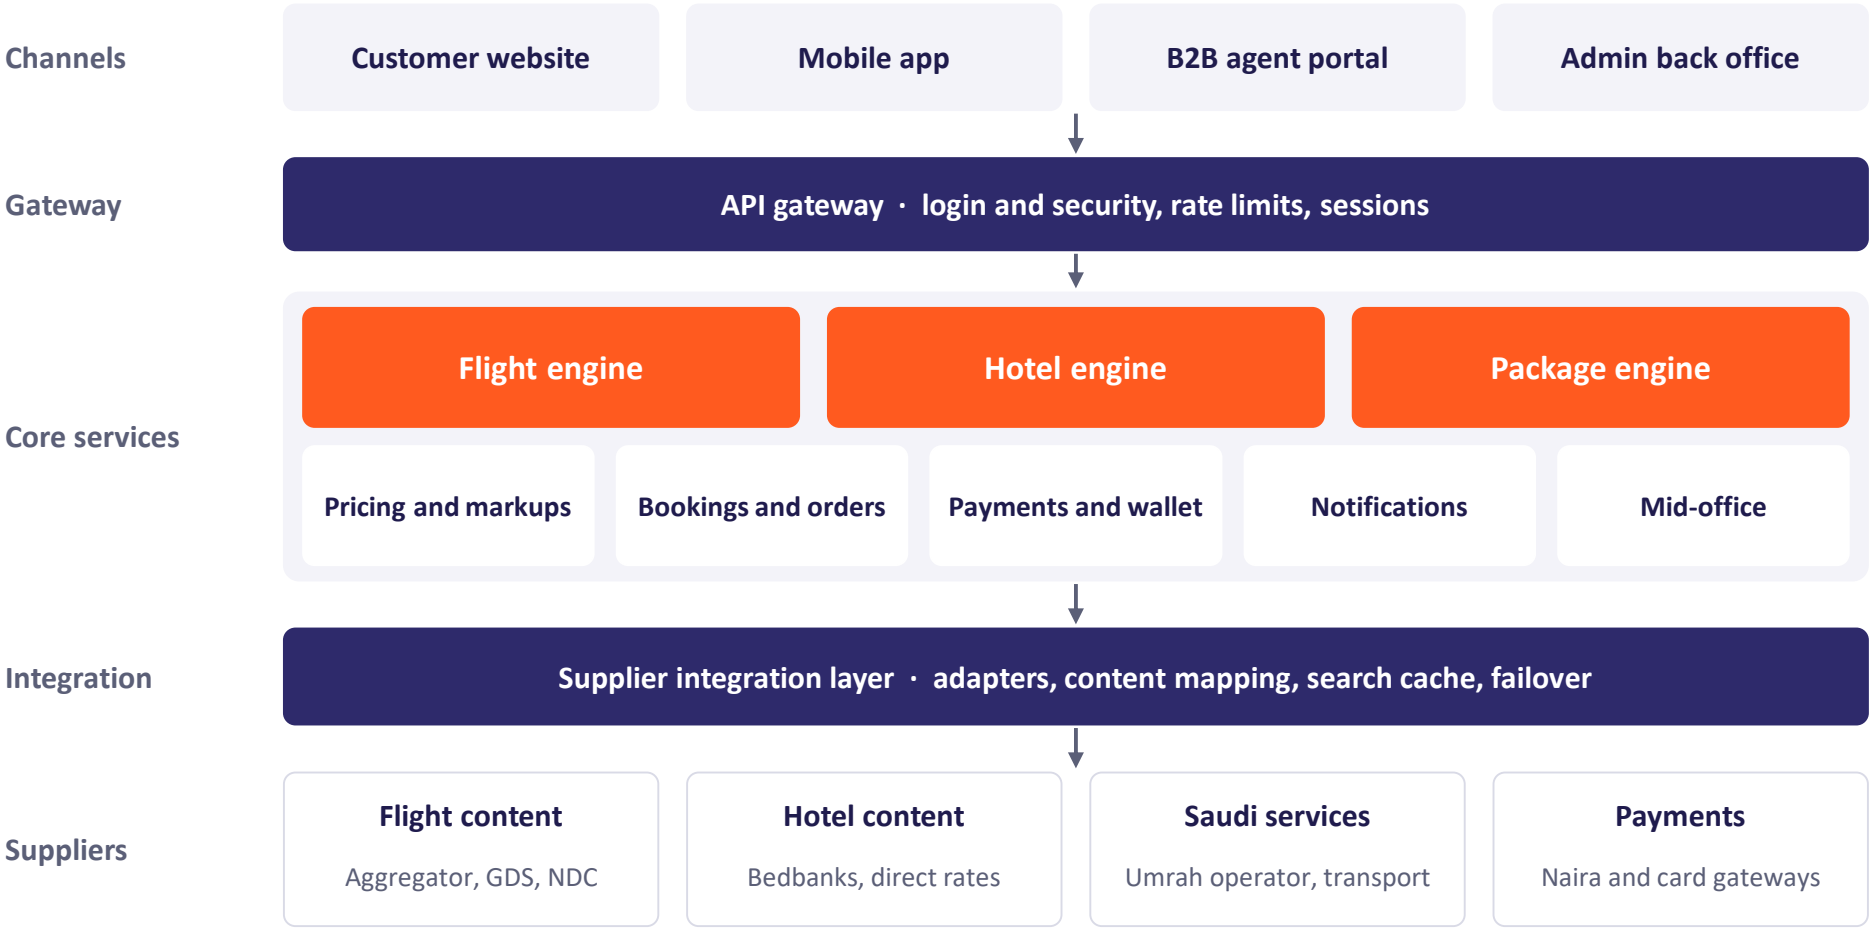

- Umrah and Hajj packages from our own database
- Quick search by country, package type and month
- Client and admin dashboards
- Agent sign-up
- Manual handling of flights and hotels

Target

- One search for flights, hotels and packages
- Live inventory and prices from suppliers
- Online payment, wallet and installments
- Automated e-tickets, vouchers and alerts
- B2B portal for sub-agents
- Back office with accounting and reconciliation

SYSTEM ARCHITECTURE

Five layers between the customer and the supplier

Data and infrastructure

- Database: bookings, customers
- Cache: searches, sessions
- Queue: ticketing, alerts
- File storage: tickets, vouchers
- Cloud hosting and CDN
- Monitoring and logs
- Firewall, 2FA, tokenised cards

Every supplier sits behind Raudah's own integration layer, so suppliers can be added or swapped without changing the website.

BOOKING FLOW

Seven steps from search to confirmed ticket

1	2	3	4	5	6	7
Search	**Select**	**Re-price**	**Details**	**Pay**	**Issue**	**Confirm**
Customer enters trip	Compares options	Sees final price	Adds travellers	Card, transfer, USSD	Waits seconds	Gets documents

BEHIND THE SCENES

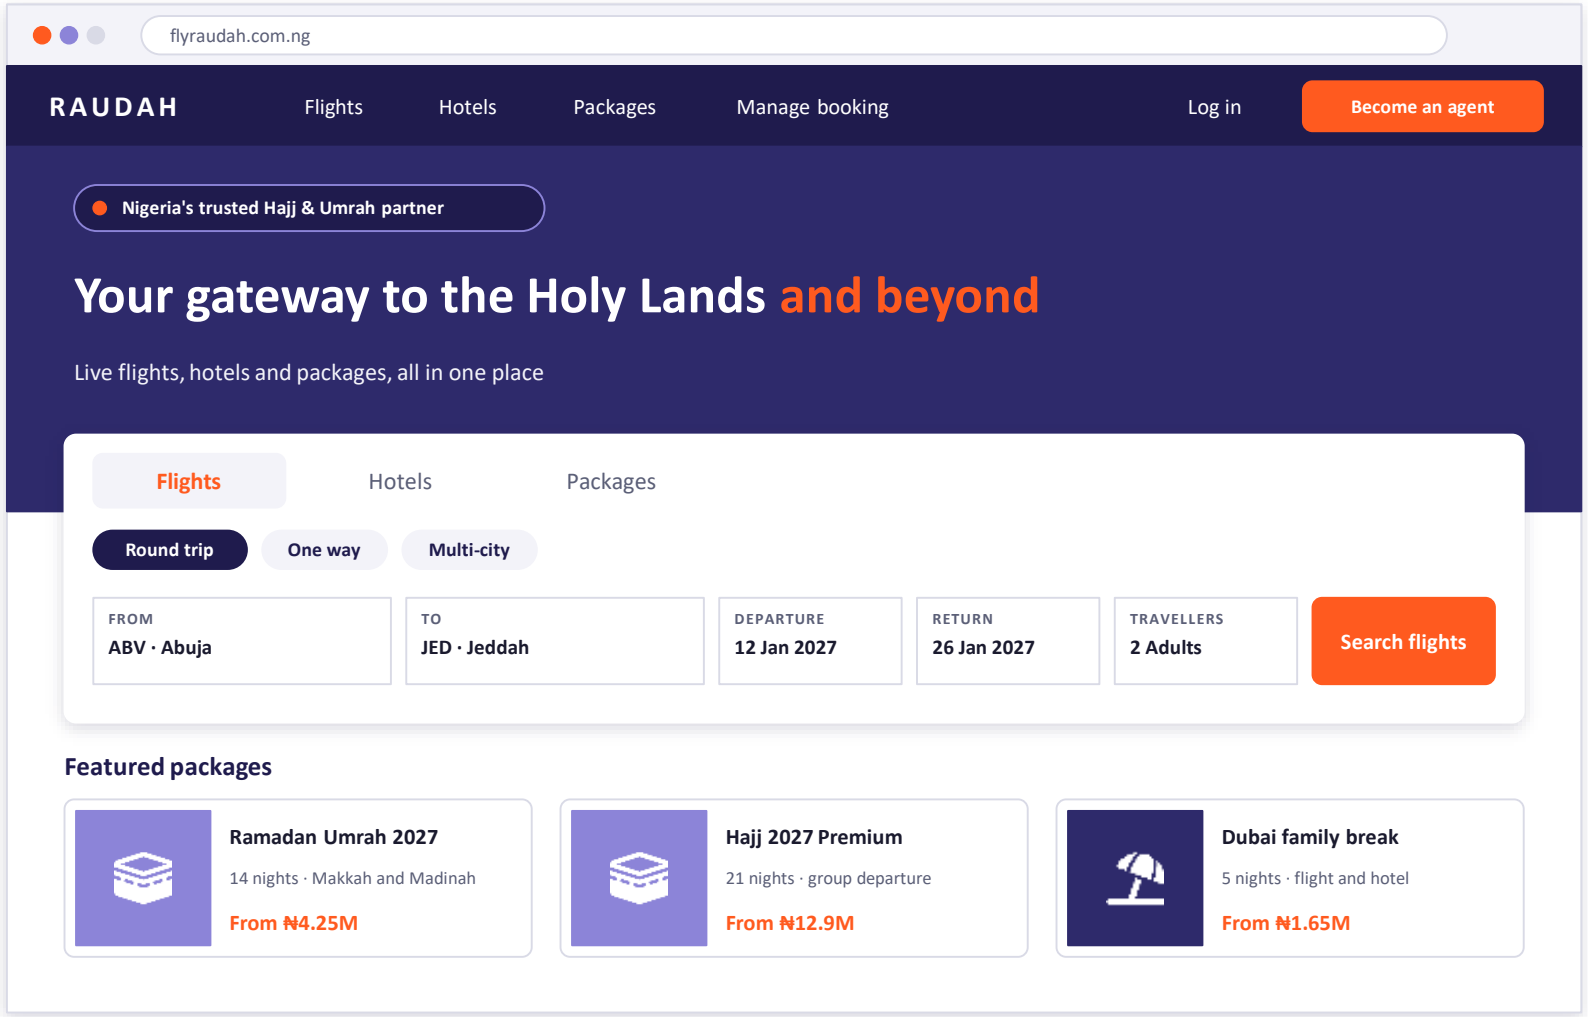

Cached and live supplier search	Fare rules and baggage fetched	Live price check with supplier	Passport and name validation	Hosted checkout, payment verified	Booking created, ticket queued	E-ticket, SMS and WhatsApp sent

If payment fails or arrives late, the ticketing queue holds the booking and never issues a ticket without confirmed payment.

One search box for every trip

The homepage keeps Raudah's Holy Lands identity and adds a Wakanow-style search for the three services.

- **Three search tabs**
  Flights, Hotels and Packages only
- **Trip types**
  Round trip, one way and multi-city
- **Featured packages**
  Umrah, Hajj and tourism offers below

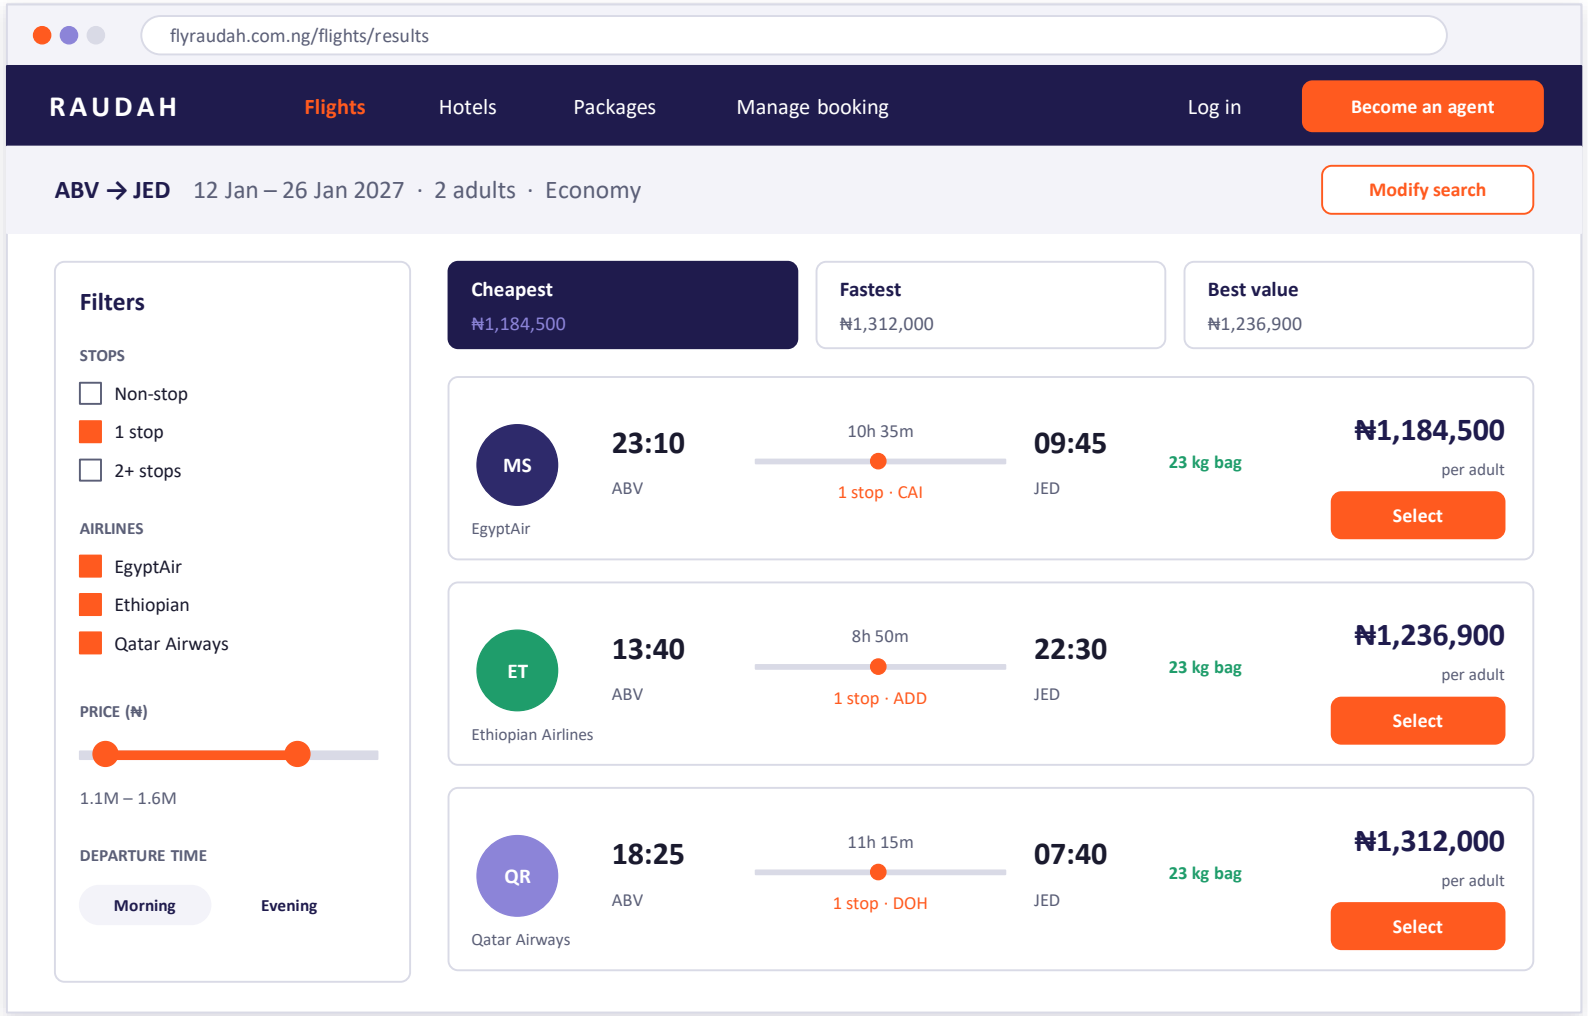

Illustrative mockup

Live fares, easy to compare

Results stream in from the flight aggregator and can be filtered and sorted instantly.

- **Smart filters**
  Stops, airlines, price and departure time
- **Clear fare cards**
  Times, duration, stops and baggage
- **Sort tabs**
  Cheapest, fastest and best value

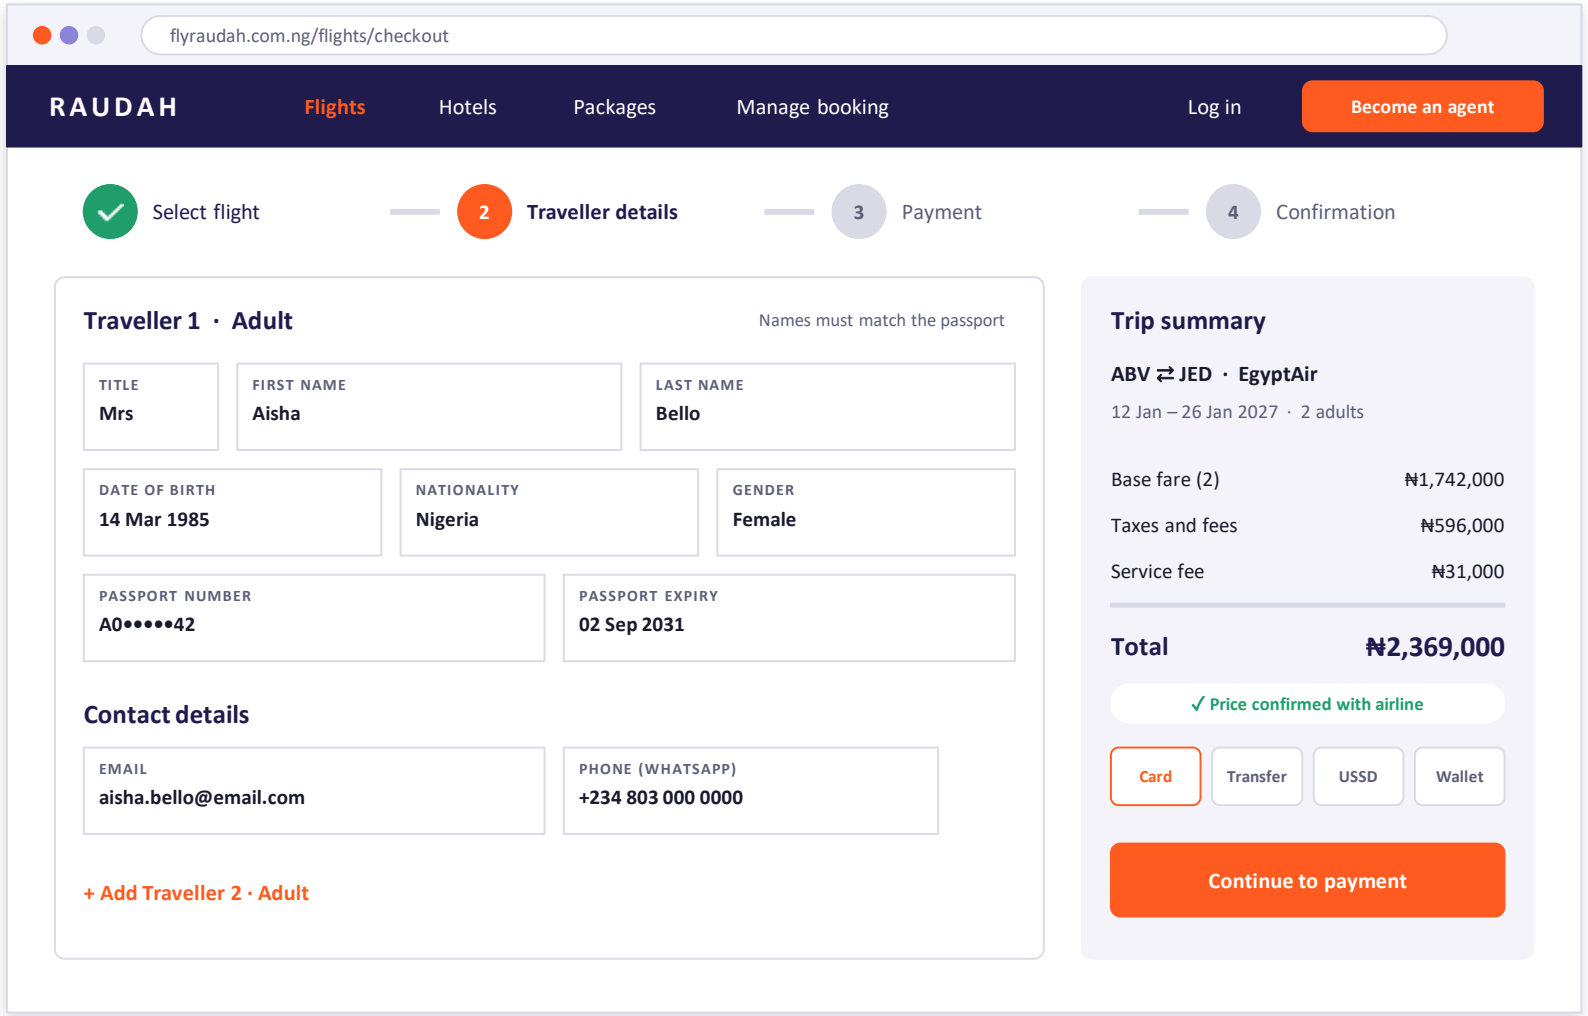

Illustrative mockup

A short, safe checkout

Travellers enter passport details once, see the confirmed price, then pay in Naira.

- **Step tracker**
  Always clear where the customer is
- **Price confirmed**
  Live re-check with the airline
- **Local payments**
  Card, bank transfer, USSD or wallet

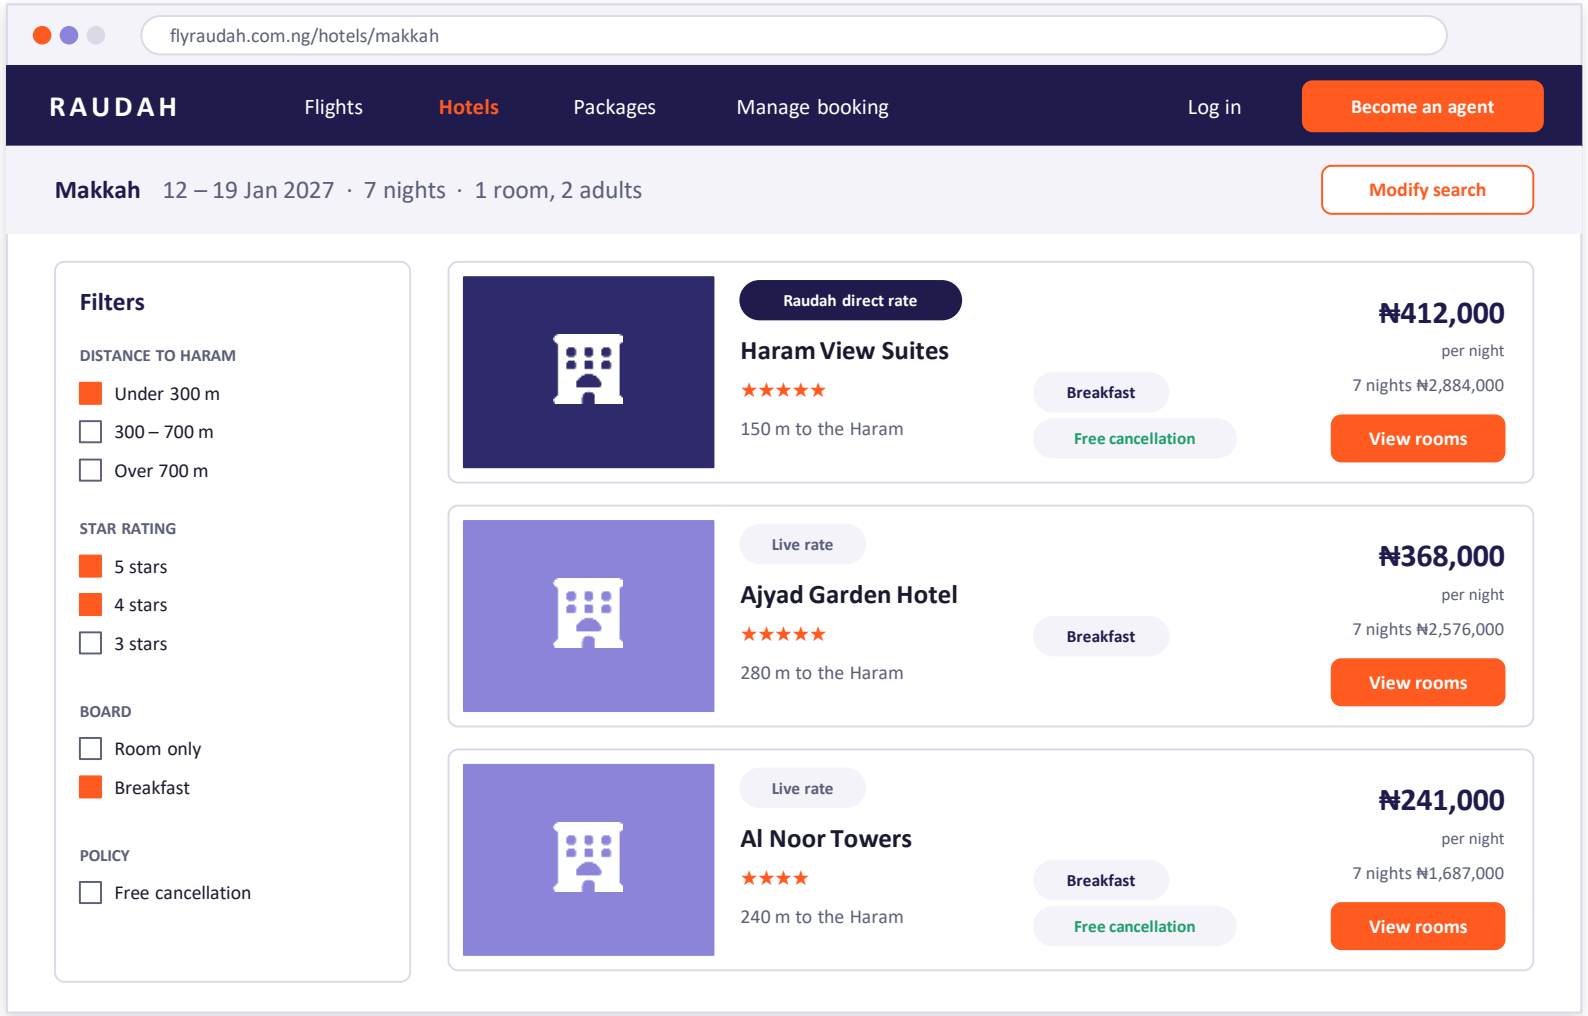

Illustrative mockup

Hotels ranked by what pilgrims care about

Bedbank rates and Raudah's direct Makkah and Madinah contracts appear side by side.

- **Distance to the Haram**
  The first filter for Makkah and Madinah
- **Direct-rate badge**
  Highlights Raudah's own contracted rooms
- **Clear terms**
  Board type and free cancellation upfront

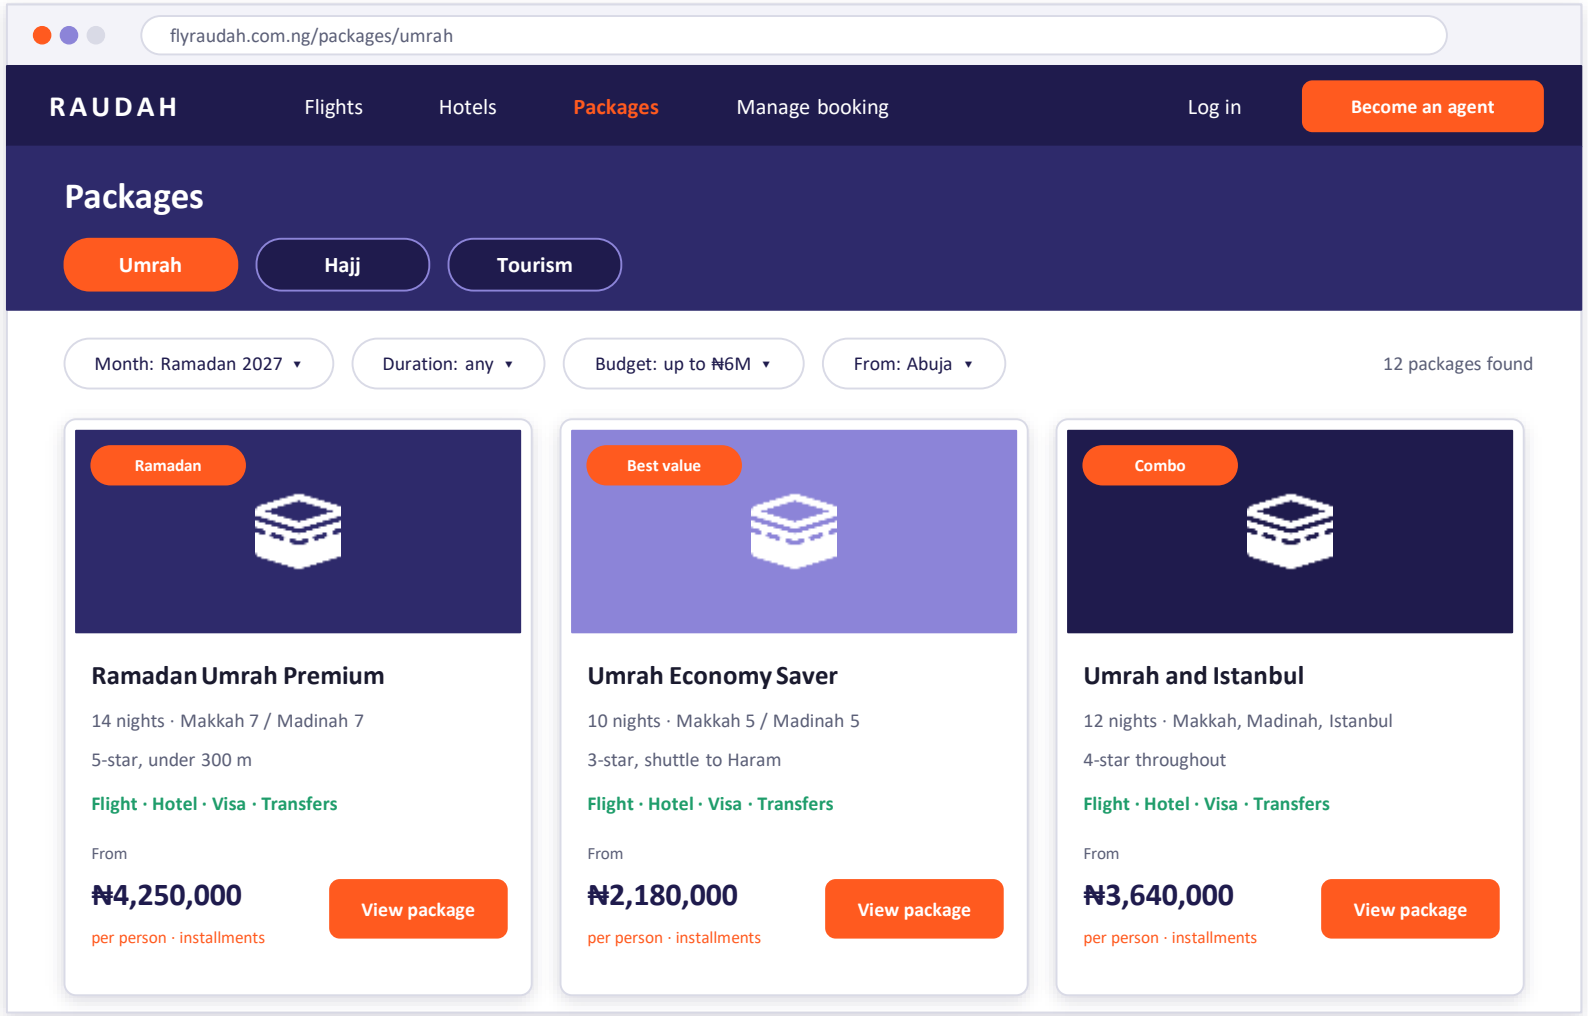

Illustrative mockup

Umrah, Hajj and tourism packages in one place

Packages combine flights, hotels and ground services into one price, with installment plans.

- **Three package tabs**
  Umrah, Hajj and Tourism
- **Season filters**
  Month, duration, budget and departure city
- **Pay in installments**
  Popular for Hajj and Ramadan Umrah

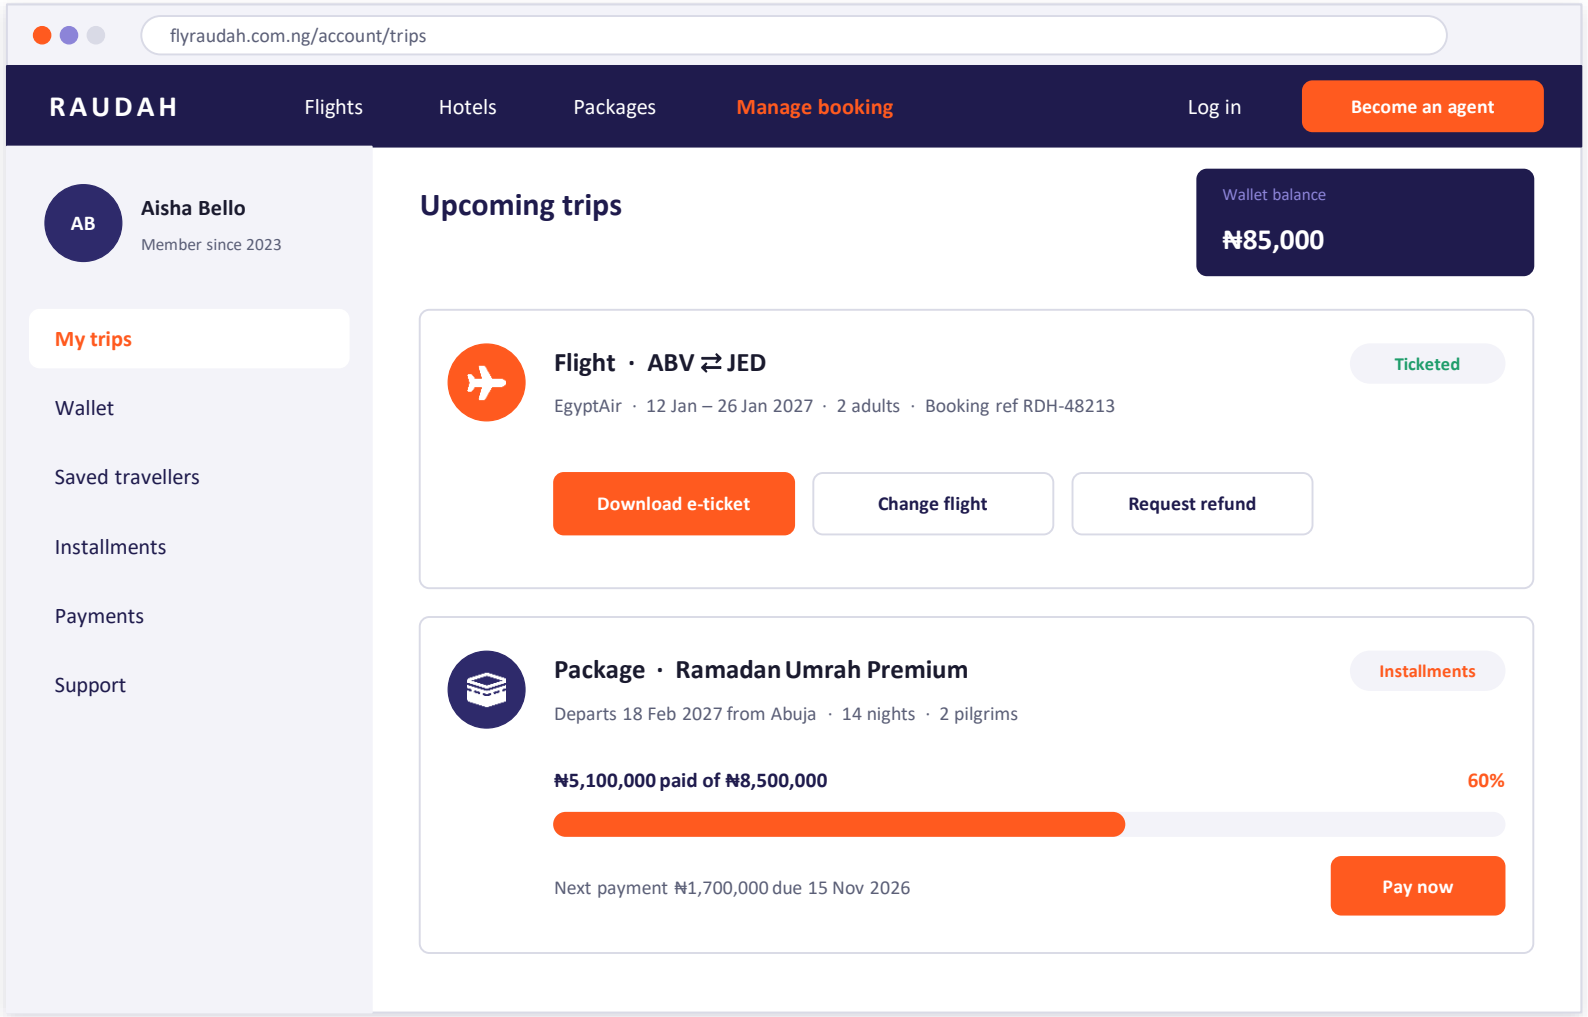

Illustrative mockup

Every trip, payment and document in one account

Customers manage bookings themselves, which reduces calls to the support team.

- **All trips together**
  Flights, hotels and packages
- **Installment tracker**
  Paid amount and next due date
- **Self-service**
  E-tickets, changes and refund requests

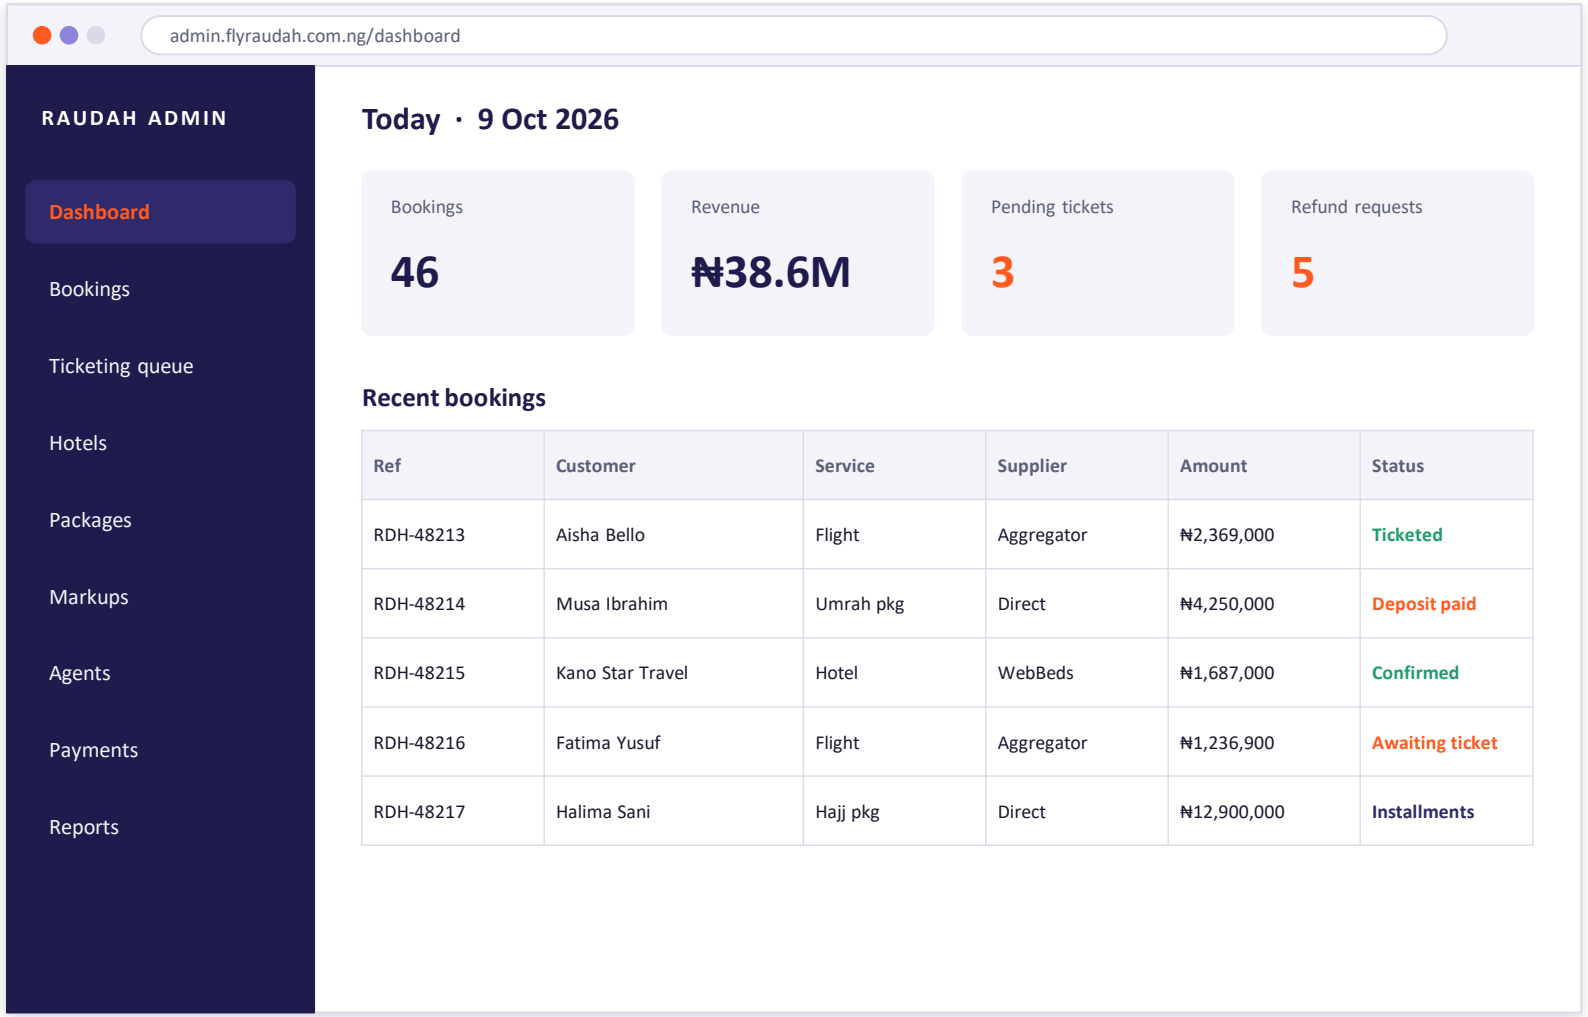

Illustrative mockup

Full control of bookings, suppliers and money

Staff see every booking across suppliers and act on exceptions before customers notice.

- **Live KPIs**
  Bookings, revenue, pending tickets, refunds
- **One bookings table**
  Flights, hotels and packages together
- **Controls**
  Markups, agents, supplier balances, reports
